Certifications

Generative AI & LLMs Foundations:
From Basics to Application

Building LLM Powered Applications -
Create Intelligent Apps

Introduction to Cloud Computing

Developing AI Applications with
Python and Flask

Introduction to HTML, CSS, &
JavaScript

Hassam Akram

AI/ML Engineer | Generative AI | RAG | Student of University Of
Engineering and Technology, Lahore
Narowal District, Punjab, Pakistan

Summary

I am an AI/ML Engineer with expertise in Generative AI, Large Language Models (LLMs), and Retrieval-Augmented Generation (RAG) systems. My professional focus is on building and deploying scalable AI solutions that combine machine learning, deep learning, and natural language processing to solve complex real-world problems.

I have hands-on experience with LangChain, where I design and implement RAG pipelines that seamlessly integrate LLMs with structured and unstructured data sources. My technical background allows me to deliver end-to-end solutions—from data preparation and model training to production deployment and optimization.

Key Areas of Expertise:

Generative AI & LLMs (Prompt Engineering, Fine-Tuning, Model Integration)

Retrieval-Augmented Generation (RAG) with LangChain

Machine Learning & Deep Learning Applications

Intelligent Automation & Chat Systems

I am passionate about leveraging AI to create impactful solutions, and I am open to opportunities in AI/ML engineering, research, and applied AI development.

Experience

Arch Technologies
Internship Trainee

August 2025 - Present (5 months)

CodeAlpha

Intern

June 2025 - August 2025 (3 months)

Education

University of Engineering and Technology, Lahore

Undergraduate computer Science , Computer Science · (December 2022 - December 2026)

Superior Group of Colleges

· (March 2019 - August 2021)

University of Engineering and Technology, Lahore

· (December 2022)

University of Engineering and Technology, Lahore

Bs.c computer science , Computer Science · (2022)
