

MCHAT-R Screening Report

Child: amman fatima

Screening date: March 31, 2026 at 01:07 PM

Results

Total score: 6/20 (Score range 3–7 = MODERATE risk)

Interpretation: Monitor — Administer M-CHAT-R Follow-Up for elevated items. Refer if 2+ items remain elevated.

Full guidance: The score indicates MODERATE likelihood for autism. Administer the M-CHAT-R Follow-Up items that correspond to the elevated likelihood responses. Only those items which were scored as elevated likelihood need to be completed. If 2 or more items continue to indicate elevated likelihood, the result is a positive screen. Refer the child immediately for (a) early intervention and (b) diagnostic evaluation.

Elevated likelihood items (for Follow-Up):

1. Q2
2. Q5
3. Q12
4. Q16
5. Q18
6. Q19
